

Lichen Green paint (Farrow & Ball) on the smaller interior walls complements the soft green hues in the wallpaper, the rustic grey floor and the naturalistic theme of the planting outside

Indoor plants such as hanging/potted  
Ferns will feature on the  
Window sill and shelves/cabinets

Iron framed mirrors - modern use  
Of metal found in Iron Age site at Greystones

'Willow' designer wallpaper by Charlotte Jade. Charlotte's wallpaper brings the beauty of the outside in by creating hand drawn, interior patterns inspired by nature, blurring the lines between interior spaces and the outside world. This wallpaper comes from her Leaves & Foliage Collection - the patterns within this collection are all either hand drawn or painted, creating richly detailed prints with a soft sense of movement.

The intention is to place the willow wallpaper on the window/door walls to harness the sense of movement as though the planting is reaching inside. It also connects with the willow planting outside.

Two leather loungers facing out to the garden create a relaxed living area

Circular glass drinks tables mirror circular accents in garden

Saige rustic grey flooring connecting the two spaces
